- Solved assorted grievances and concerns of customers in a timely and courteous manner, enhancing the customer experience.
- Processed and set merchandise according to schedule as well as proper display standards.

EDUCATION

Data Analytics Certification | University of North Carolina Charlotte

2020 - 2021

Bachelor's Degree | University of North Carolina Charlotte
Theatre Arts

2005 - 2010

PROJECTS

HAKUNA MOSCATO

Personal Role/Responsibilities:

Utilizing Python, Heroku, Google Cloud App, as well as HTML and JavaScript, built a custom dashboard for the front-end design of the app. Also, using a knowledge of web scraping and API's, scrape the Global Wine Score API for a secondary dataset to go along with the initial dataset pulled from Kaggle.

Project Description:

- Using data scraped from the Global Wine Score API as well as a dataset from Kaggle, the goal of this project was to determine what factors affect wine quality, including country of origin, price, color and vintage.

Languages and Technologies Used:

- Python
- Jupyter Notebook
- Heroku
- Google Cloud App
- Bootstrap, HTML, CSS, JavaScript
- D3, Leaflet, Plotly

CHARGED UP

Personal Role/Responsibilities:

Built a Flask app with the ability to run on Herokuy and created a custom dashboard to display the findings from the data analysis of Electric Vehicles and Supercharger Stations, with emphasis on stations located within the United States.

Project Description:

- The goal of this project was for the team to take EV Charging Station data as well as data on the vehicles themselves, to analyze the existing network of charging stations to determine if owning an EV in the United States is a viable option based upon the range and price of existing available electric vehicles for purchase.

Languages and Technologies Used:

- MongoDB, PyMongo
- Jupyter Notebook
- Python, Pandas
- Flask, Heroku
